EXPERIENCE

SOFTWARE ENGINEER II, **PowerSchool,** Remote, May 2018 – Present

- Working with cross-functional AGILE teams developing applications used by millions of users.

- Translating designs and wireframes into executable plans and high-quality code.

- Seeing a project from conception to completion

- Managing updating and adding to a library of documentation.

- Onboard new developers and provide mentorship.

- Managed migration from static content distribution from NGINX to versioned Cloudfront hosting.

- Integrated a front end testing suite using Jasmine and promoted a culture of testing on the team.

- Implemented and created on-screen accessibility tools to help our millions of users.

- Led the team updating branding and site layout to a more modern design.

- Promoted four times in four years, an accelerated rate.
